[Surgical Case Carts](#) that **CREATE SPACE.**

- ◆ **Material** - Type 304 stainless steel
- ◆ **Top** - 16 gauge stainless steel
- ◆ **Cabinet** - single-piece 18 gauge
- ◆ **Center shelf** - hammed safety edge free of bacteria-gathering crevices. Shelves are removable and adjustable on 3/4" increments
- ◆ **Doors** - all stainless double-panel doors have integral drain system to eliminate entrapment of moisture. Double-panel construction adds stability to cabinet. Doors are removable when open for easy cleaning. Latches are nickel-plated brass with tension adjustment. Doors can be locked open with a door clip mechanism, then released with a press of the foot.
- ◆ **Casters** - four 5" (127.0mm) swivel plate casters (two swivel-brake, one swivel-lock, one swivel) are stainless steel with polyurethane tread grease fittings. Other caster combinations are available on request.
- ◆ **Bumper** - stand-out wraparound bumper is mounted to solid stainless steel frame. Bumper absorbs shock and helps prevent damage to the cart from collisions with walls and barriers.
- ◆ **Systems** - adaptable to automatic conveying and inject-eject elevator systems.
- ◆ **Additional sizes** - available on request.

36" or 48" depending on model

door clip mechanism
